THE ANTI-MOSQUITO SHUTTER

Scan the **QR CODE** or digit **ar.pracal.com** to see shutters like you've never seen them before with **Augmented Reality!**

**Insulated aluminum roller shutter with microperforated hooks**, designed to block the entry of insects.

The hooks between the slats, which are higher and stronger than traditional ones, make the roller shutter as functional as a mosquito net.

Thanks to the adjustment of the fabric, the natural passage of air and light can be encouraged.

Insulated aluminum profiles available in **High and Medium density**, made from environmentally friendly polyurethane foam, provide **thermal and acoustic insulation**, combining comfort and sustainability.
