PRACAL
Sistemi oscuranti innovativi

History

Who we are

Founded in the early 1980s in one of the most beautiful and sunniest regions in Italy.

Our history speaks of a company that was structured with sacrifice and dedication, this has allowed us to gain the experience and professionalism necessary to improve the Blackout Systems.

Pracal today is a registered trademark, which represents a renewed reality: we are the specialists in the production of innovative darkening systems.

We were born as Sitarplast, dealing mainly with the assembly of roller shutters, we have come a long way since then!

What do we do?

We create innovative darkening systems

We have been making shutters and accessories for forty years innovative, different from the usual "gears".

We offer a suitable roller shutter for each home and suitable for the area in which it is located.

Our products are easy to use, do not crash and have an attractive design.

We only make excellent shutters.
Do you want to become our reseller?

In recent years Pracal has strengthened the brand awareness among the network of distributors and resellers Italian and international, through targeted communication and the development of its presence on corporate communication channels: institutional social profiles, the Blog and Email Marketing.

We constantly communicate with our Partners to keep them updated on new products, technologies and commercial initiatives.

MADE in ITALY

We are located in Polla (SA), Campania

The head office has been located in Italy, in Polla (SA), for 40 years and it is here that our products are designed and manufactured.

Our experience in the sector of Blackout systems allows us to create roller shutters that guarantee protection from bad weather, UV rays and break-in attempts, without ever giving up the design of the furniture.

Made in Italy also means attention to detail and continuous technological research, which allow us to create new patented products and increasingly innovative solutions.

Research & Development partnership with University of Naples Federico II

Collaboration with the University research center on
Structural Composites for Innovative Constructions

03

Research and Development

We create innovations that improve well-being in homes

The internal area dedicated to Research & Development allows us to create innovative and high-performance items that improve the entire sector of darkening systems and well-being in every home.

This is possible thanks to the right combination of people attentive to customer needs and cutting-edge technologies that allow the product to be successful over time.

Pracal with the University of the studies of Naples Federico II

Every activity carried out in Pracal is aimed at satisfying the needs of those who choose us.

For this reason we are oriented towards creation of products that adopt applied research combined with cutting-edge technologies.

Accompanying us on this journey is the University of Naples Federico II.

This collaboration with the Research Center Interdepartmental Committee on Structural Composites allows us to obtain technical and innovative solutions which result in optimized products that are easier to use, design, respectful of the environment, able to last over time and ensure the comfort that everyone would like to have in their home.

UNIVERSITÀ DEGLI STUDI DI NAPOLI
FEDERICO II

Why Pracal?

The pluses that distinguish us and have led us to be leaders in Europe in darkening systems

04

Why Pracal? Awareness of the future

Pracal works to fully satisfy the needs and expectations of the window and door sector.

AS? Propose made in Italy roller shutters that allow the right ventilation and brightness to every home, so as to improve well-being, without sacrificing safety and design finish.

Complete protection against UV rays, bad weather and theft.

Research and Development

We create innovations that improve well-being in homes

Environmental sustainability:

the entire energy requirement of production is covered by a photo-voltaic system. We recycle almost everything our production waste.

Furnishing style:

we customize the product by differentiating it by colors, characteristics and condominium or landscape constraints.

Safety:

we protect homes from intrusions. Different models of roller shutters are also equipped with anti-burglary certification.

Our Painting

Impeccable painted profiles, designed to maintain their technical and aesthetic qualities over time

We have an advanced painting system that allows us to take care of the entire coil painting cycle

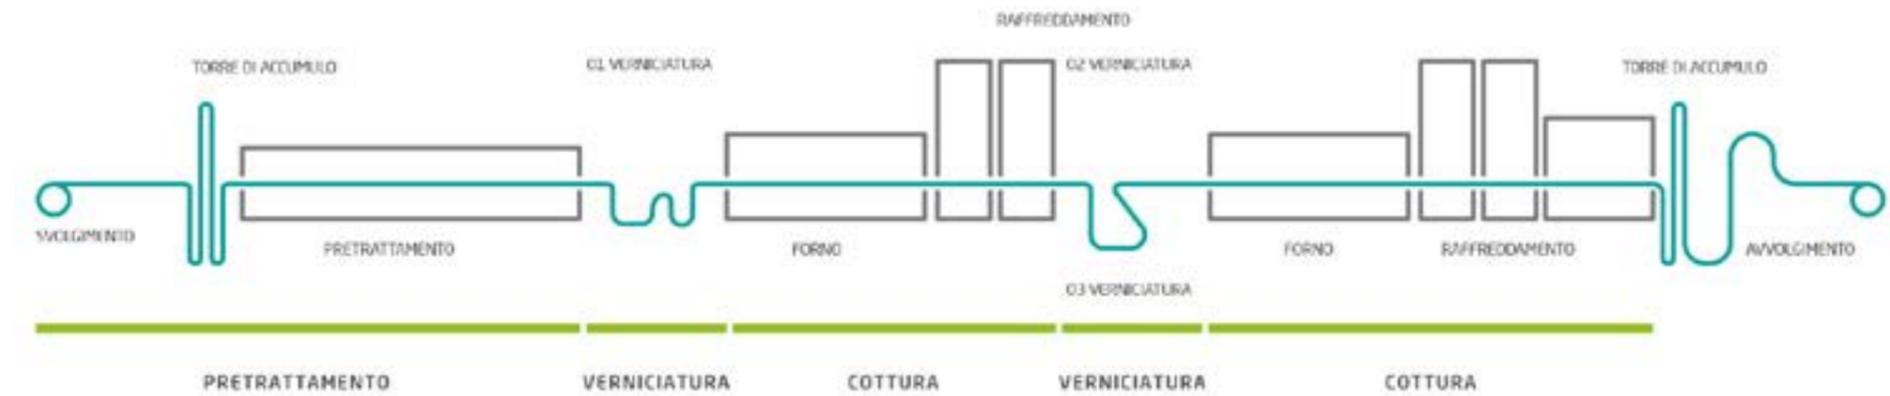

Our catalog offers a vast choice of colors that provide excellent finishes. Our colors last over time

Customization of produced based on the customer's technical and design needs with high quality results

Finishes in aluminium, steel, wood effect, Raffaello, corten and MATT. OVER 100 colors to satisfy everyone

Our color palette for aluminum

For aluminum shutters with an elegant and refined design

The paint for aluminum shutters and roller shutters are formulated to adhere perfectly to the surface of the profile.

Choose from over 68 shades, from the most subtle to the most vibrant.

Consider the option of eccentric colors as well as not to go unnoticed or opt for wooden finishes, always elegant.

Pre-painted steel

We improve the characteristics of the metal

A team of experts follows the pre-painting process on steel, ensuring precise machining of the product.

Pre-painted steel keeps the aesthetic and performance qualities of the roller shutter intact, this is because pre-painting gives the metal characteristics that make it more resistant to bad weather.

We are talking about an anti-corrosive, anti-abrasive and anti-scratch product which, unlike PVC-coated steel, it guarantees the originality of the product over time, eliminating the detachment of the film.

We completely customize profiles, offering a wide choice of colors and finishes.

PVC coated steel shutter exposed to the elements

Our MATT color palette

For aluminum shutters with an elegant and refined design

We are the only ones in Italy to create matt finishes on aluminum profiles, already available on our Ariel, Zazà, Bicolore and L15 models.

The MATT finishes include two different sections: Classic and Country, for a total of 13 colors designed and formulated in line with the architectural style contemporary.

All the safety of our painting in a matt, refined and elegant finish.

Who is the MATT Collection designed for?

For those who want darkening systems with the guarantee of:

- greater resistance to atmospheric agents;
- zero abrasion e corrosion;
- duration over the years.

The profiles

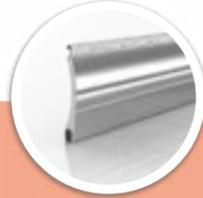

Insuled and extruded aluminium, pre-painted steel and PVC

05

The profiles

Available for immediate delivery

Insulated aluminum profiles

Ecological expanded polyurethane with high stability and long life.

Insulated steel profiles. pre-painted

the paint layer forms the steel more resistant to corrosion ensuring a long life of the roller shutters and roller shutters

Extruded aluminum profiles

high stability and long life without the need for maintenance.

Eco-friendly PVC profiles

perfect insulation thermo-acoustic, does not pollute and safeguard the environment.

Our roller shutters are built with materials that last over time. We ensure that our customers purchase with complete peace of mind, which is why we also offer a guarantee of up to 15 years on all Pracal products. Our roller shutters are built with materials that last over time.

We ensure that our customers purchase with complete peace of mind, which is why we also offer a guarantee of up to 15 years on all Pracal products.

Our patents

Available for immediate delivery

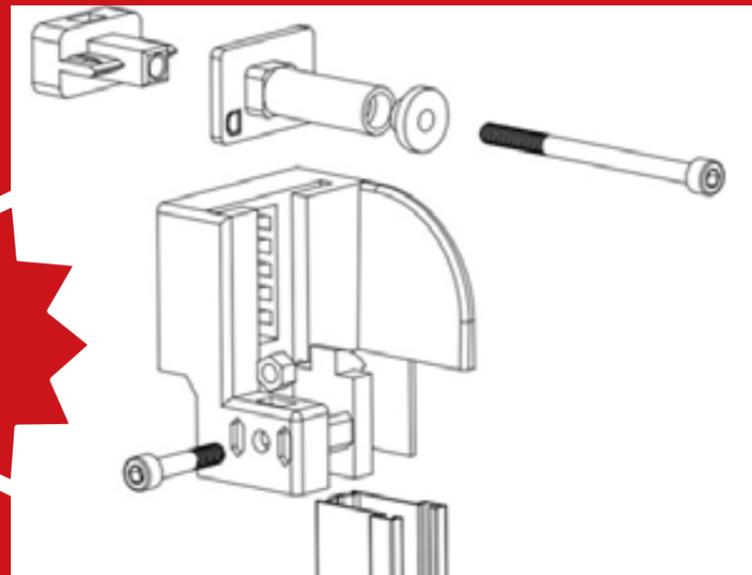

Invitation to the Universal Guide®

Our Patent comes as a single pre-assembled piece

It can be installed on different guide models, allowing both horizontal and vertical adjustment guarantees better adaptability even in cases of outages of quadrature.

Our invitation, through the use of a roller, allows you to facilitate the sliding of the roller shutter.

NEWS

Our patents

Available for immediate delivery!

Double brush guide®

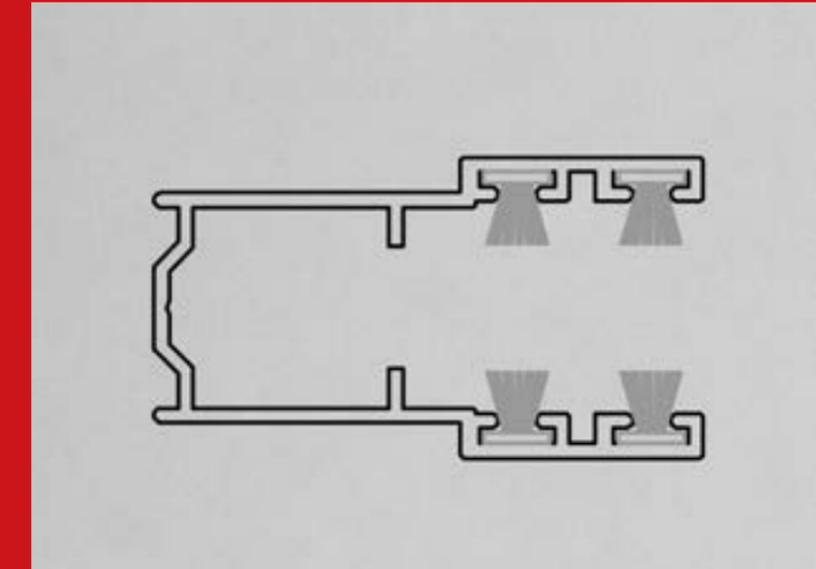

Our patent allows the installation of the new unit without removing the old one, when present still working or cannot be removed.

This type of track has 4 space slots 16 mm, which accommodate the anti-noise toothbrushes capable of limiting friction and the presence of drafts.

For greater safety in case of exposure to strong winds, 2 fins are expected at the bottom the guide that, together with an anti-wind bolt, allow the shutter to be fixed, preventing it from coming out of the guides.

It is the ideal solution for those who are renovating home.

NEWS

The advantages for our customers

We help our partners grow.

Eco-sustainability

Eco-sustainable packaging, recycling of materials, photovoltaic energy production

10

PRACAL
Sistemi oscuranti Innovativi

We are an eco-sustainable company

Protection of the environment with respect for future generations

We carefully evaluate the environmental impact of our company.

We do not give up on the production of products that they meet international demands and we do choosing the advantages offered by natural resources.

The energy needs of productionmain is guaranteed by the installation of panels photovoltaic systems that reduce the impact to a minimum environmental.

We protect nature while respecting others generations by completely eliminating waste: recovering processing waste.

We pack

Eco-sustainable and personalized packaging

We follow the entire supply chain of our products up to the packaging phase.

This phase is designed to guarantee maximum protection for the profiles and shutters using eco-sustainable and recyclable materials.

For this reason, our collaborators ensure the integrity of the product during loading, during transport and upon delivery to the customer.

Our automated packaging system optimizes delivery times, allowing us to significantly reduce our customers' waiting times.

Corporate eco-sustainable progress

Transparent communication

By 2025 we expect to obtain a Sustainable Budget that entirely reuses the production waste of the raw materials used:

- Aluminum;
- PVC;
- Polyurethane foam;
- Cardboard;
- Packaging plastic.

Industry 4.0

New processes and corporate computerization to connect the company with the outside

11

PRACAL
Sistemi oscuranti Innovativi

Industry 4.0

Perfect combination of people and technology

We are a modern production system, which operates internationally.

The automation technology activated on the 35 production lines allows us to have greater control of the entire production process and a greater level of order customization.

Logistics managed with internal means guarantees faster delivery times.

Our innovative dimming systems are the result of a perfect combination between the work of highly qualified people and advanced technology.

Augmented Reality by Pracal

Shutters like you've never seen them before

12

PRACAL
Sistemi oscuranti innovativi

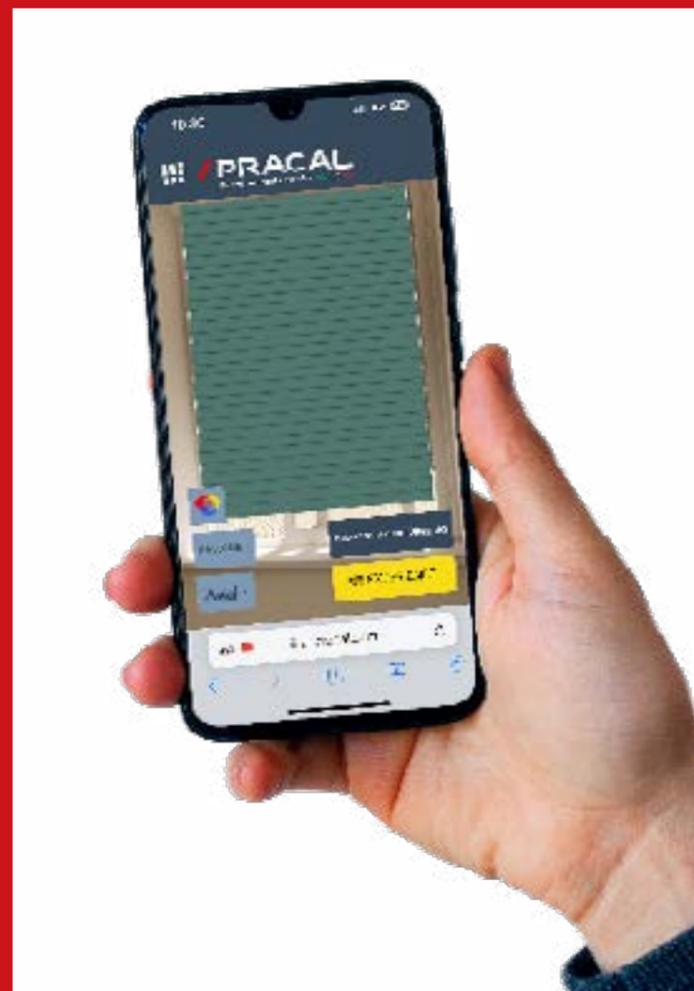

Augmented Reality di Pracal

Shutters like you've never seen them before

At Pracal, we are determined to drive change in the blackout industry by focusing not only on perfecting products, but also on enriching the shopping experience.

With Pracal Augmented Reality we offer you an unprecedented way to interact with our innovative darkening systems. Your customers can now virtually experience Pracal shutters by understanding their technical specifications and obtaining a clear vision of the preferred model installed virtually on the window hole.

But that's not all, in AR there is a section dedicated to you entitled "Exhibition Corners" which also allows you to configure and position the displays in the new exhibition corners of your showroom.

Pracal Augmented Reality

Offer your customers an easy and fun shopping experience with Pracal AR

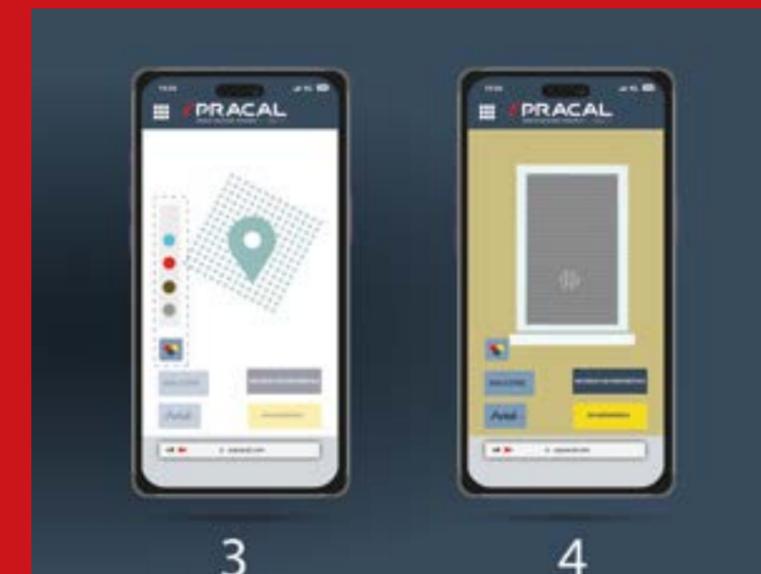

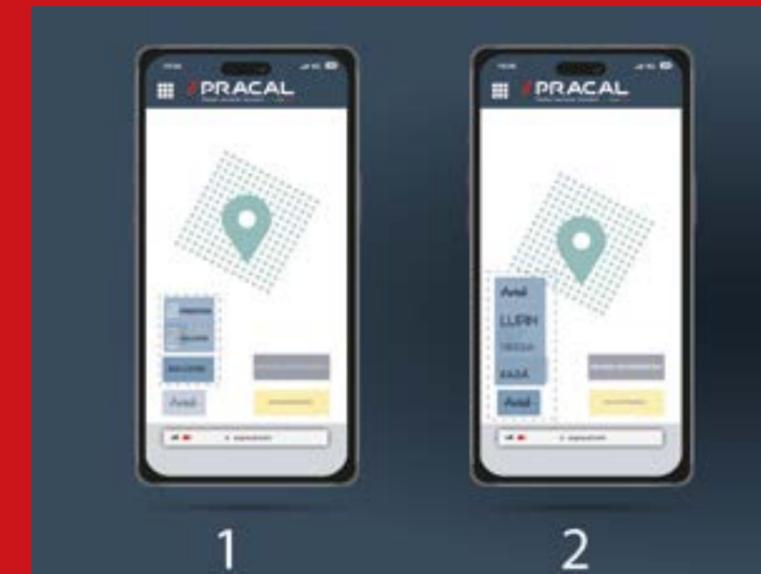

Pracal Augmented Reality transforms the selection of roller shutters into an interactive, simple and well-informed experience.

In addition to the AR functions, the platform offers detailed technical data sheets on each roller shutter model, demonstration videos and practical advice, such as "how to take the correct measurements". To do all this, all you need is a smartphone!

Point the phone towards the window and follow the instructions you find in the Pracal AR guide. Select your favorite roller shutter model with a tap and let the AR configure the roller shutter directly on your window or balcony.

With intuitive gestures you will be able to explore the design, position the roller shutter in the window hole and evaluate the color in harmony with the furnishings of your home.

Go to ar.pracal.com or scan the QR Code and get started right away.
